MSUA BRINGS BACK HIGHLY ACCLAIMED MSUA-4 INTERNATIONAL CONFERENCE AND EXHIBITION

McLean, VA., USA, March 7, 2007: The Mobile Satellite Users Association (MSUA) announced today that it is sponsoring the successful Mobile Satellite Users Association International Conference and Exhibition, following a five year hiatus. MSUA-4 is the only conference dedicated to the mobile satellite industry, and will be held at the Pier 5 Hotel on Baltimore's Inner Harbor, on May 21-23, 2007.

"MSUA-4 is coming at a critical time for the mobile satellite industry" explained Bob Roe, chairman of the MSUA, and president, Stratos Government Services, Inc, "With billions of dollars of investments being made in new mobile satellite systems; companies are offering a wide range of more advanced voice and data services, with much smaller, cheaper terminals. We think this conference will be of great interest to both mobile satellite distributors and customers throughout North America, as the only opportunity to hear from all the major providers of MSS and learn from the experiences of other MSS end users."

Tim Farrar, MSUA president, noted that "The first day includes a workshop on Ancillary Terrestrial Communications (ATC), an in-depth look at this exciting new technology and how it may change the mobile satellite industry." He continued, "On May 22, MSUA-4 will feature existing and future mobile satellite service (MSS) providers, detailing their plans for new and enhanced services, while on May 23 the conference will hear from end users of MSS, describing their requirements and needs for the future."

Exhibition and sponsorships are available for MSUA members and non-members, with early bird discounts available through March.

For full details contact Betsy Kulick for information on sponsorships (sponsorship@msua.org), George Zachmann for information on exhibits (exhibits@msua.org) and Tara Blair for registration information (1-757-747-2342) or register on-line at www.msua.org/msua4.

Mobile Satellite Users Association is a non-profit organization dedicated to promoting the interests of the users of Mobile Satellite Services (MSS) worldwide. It serves the interests of MSS users by fostering communications among and between MSS users, suppliers of MSS equipment and services, operators of MSS satellite systems, and the various entities that may affect the future of the industry. In addition, MSUA reviews, analyzes and reports on, from an MSS user's perspective, the activities, regulatory decisions and critical events of the MSS industry. Finally, MSUA provides a means of assembling MSS users' views on system and service concerns and conveying these concerns to the appropriate authorities.
